

# CHEM-EXTRA

# B

Powered by Manni-Plex™ Technology

## GENERAL RECOMMENDATIONS

CHEM-EXTRA-B is a Manni-Plex based solution designed for application to tree crops, field and row crops, vegetable, flower and ornamental crops for the prevention and correction of Boron deficiencies. Manni-Plex is a proprietary blend of sugar alcohols used to complex Boron for plant nutrition. Use in a regular fertilizer program for all crops requiring Boron. CHEM-EXTRA-B mixes well with all products and in cold weather solutions.

### Cotton: Mid-Full Season Varieties

Apply 1 quart CHEM-EXTRA-B 25-35 days after emergence (pinhead to matchhead square). Follow with 3 or more applications 10 days apart.

### Cotton: Early Varieties

Apply 1 quart CHEM-EXTRA-B 25-35 days after emergence (1 week before pinhead square). Follow with another application 1-2 quarts 10-15 days later.

### Vegetables, Fruit Tree and Field Crops

Apply 2-4 pints CHEM-EXTRA-B per acre per application throughout the growing season. At least 2 applications are recommended. More frequent applications at 1.5 quarts per acre may be needed to correct deficiencies once they occur.

### Ornamental Crops

Apply 2-4 pints CHEM-EXTRA-B per 100 gallons water. Cover foliage thoroughly to point of runoff.

Use a minimum 10 gallons water per acre with ground spray equipment. 3-5 gallons for aerial application.

Optimum rate of application will vary between fields, depending on soil pH and organic matter content. For best results, follow soil test or plant analysis recommendation.

## Guaranteed Analysis 4.5-0-0

## By Weight

Total Nitrogen (N) .....	4.00%
4.00% Urea Nitrogen	
Boron (B) .....	3.30%

Derived from Urea and Sodium Borate. F-1252

## Nonplant Food Ingredient:

Sugar Alcohols .....	6.50%
Purpose: To complex the micronutrients	

## MIXING INSTRUCTIONS

Put 1/3 of water in tank. Add correct amount of CHEM-EXTRA-B. Fill tank with balance of fertilizer or water. Add other chemicals, if any. Agitate adequately to mix.

**CAUTION: Check compatibility with ortho-phosphates, high potash solutions, and chemical mixtures. WARNING: Some crops may be injured by the application of Boron.**
