GENERAL INFORMATION

CHEM-PLEX™ LIQUID MAGNESIUM is a proprietary blend of a soluble nutrients and an organic complexing agent so as to enhance and maintain availability and accelerate uptake by crops. CHEM-PLEX™ LIQUID MAGNESIUM is non-phytotoxic and can be applied foliar to most crops. It is recommended for use throughout the season in a program of multiple applications for greater efficiency. This provides a continuous supply of vital nutrients at or near the time they are needed most. CHEM-PLEX™ LIQUID MAGNESIUM is environmentally safe, made with only "clean" raw materials free from heavy metal contamination.

DIRECTIONS FOR USE

CHEM-PLEX™ LIQUID MAGNESIUM can be added to most nitrogen solutions or fluid fertilizers and impregnated on dry blend fertilizer. It can be tank mixed with most pesticides. Always make a small-scale test to assure compatibility. It can be soil or foliar applied, broadcast or banded over the row and injected through irrigation systems. **CAUTION: DO NOT USE IN HIGH PHOSPHATE "STARTER" OR "POP-UP" FERTILIZER MATERIALS SUCH AS 10-34-0.**

CHEM-PLEX™ LIQUID MAGNESIUM will disperse in water with minimal agitation. It serves as a buffer when used in tank mixes with pesticides. Follow the mixing sequence: 1 Water; 2 CHEM-PLEX™ LIQUID MAGNESIUM; 3 Pesticide.

RECOMMENDED RATES

The optimum rate and timing of application will depend on local conditions and should always be made as a result of soil and/or plant tissue analysis in consultation with your local agricultural authorities. In the absence of test results, use the following as a guide:

Broadcast:

Severe Deficiency	4-6 qts per acre
Moderate Deficiency	2-4 qts per acre
Maintenance	1-2 qts per acre

Banded over the Row: Apply at 2-4 qts per acre. Repeat as necessary if deficiency persists.

Foliar Application: Apply at 2-4 qts per acre. Repeat as necessary if deficiency persists. Use sufficient water for thorough coverage. Ground: 10-20 gals. per acre. Air: 3-5 gals. per acre. If less water is used slight burn may occur. Spray either early or later in the day for maximum leaf absorption.
